

FINANCIAL INTERCOURSE BETWEEN MAN AND WOMAN

Woman: Do you drink beer?

Man: Yes

Woman: How many beers a day?

Man: Usually about three

Woman: How much do you pay per beer?

Man: \$5.00 which includes a tip (this is where it gets scary!)

Woman: And how long have you been drinking?

Man: About 20 years, I suppose
Woman: So a beer costs \$5 and you have three beers a day which puts your spending each month at \$450. In one year, it would be approximately \$5400 correct?

Man: Correct

Woman: If in 1 year you spend \$5,400, not accounting for inflation, the past 20 years puts your spending at \$108,000 correct?

Man: Correct

Woman: Do you know that if you didn't drink so much beer, that money could have been put in a step-up interest savings account and after accounting for compound interest for the past 20 years, you could have now bought an airplane?

Man: Do you drink beer?

Woman: No.

Man: Where is your airplane?
