

Sad But True!

Boy, if this doesn't hit the nail on the head, I don't know what does!

Two patients limp into two different medical clinics with the same complaint?

Both have trouble walking and appear to require a hip replacement.

The FIRST patient is examined within the hour, is x-rayed the same day and has a time booked for surgery the following week.

The SECOND sees his family doctor after waiting 3 weeks for an appointment, then waits 8 weeks to see a specialist, then gets an x-ray, which isn't reviewed for another week and finally has his surgery scheduled for 6 months from then.

Why the different treatment for the two patients?

*The FIRST is a Golden Retriever.
The SECOND is a Senior Citizen.*

Next time take me to a vet
