

a fella and his missus are having trouble conceiving  
they visit a fertility doc who says his wife is OK, and that it might be  
him  
the doc gives him a jar and says go away and return next day with a semen  
sample  
the fella returns the next day but the jar is empty,  
"whats the prob" says the doc.  
"well" says the fella "I tried the left hand and then the right hand but  
couldn't do any good  
then the wife tried, she used her right hand and then her left hand and  
still no good  
we even got the mother in law into the act, she tried her right hand and  
her left hand and then both hands and she even took her teeth out and tried  
that".

"what seemed to be the trouble" said the doc [go down]

.

"but it was no good  
none of us could get the lid off the jar"
